Note: All statistics in this table relating to dwellings, employment, area of crops, and sheep, are ESTIMATES only. In particular, rural statistics should be regarded as approximations as the information has been collected on a different basis, and subsequently converted to a Local Government Area basis. Changes in population of individual Local Government Areas and Statistical Divisions are based mainly on recorded changes in the number of dwellings. Allowance is made for changes in occupancy of larger Government hospitals, hotels, and camps; no allowance is made for temporary movements such as holiday trips etc. See also note to Table 7. Migratory population is included in Remainder of State.

- (a) Average employment during the year, including working proprietors, classified according to location of factory.
 (b) Includes owners, occupiers, etc., but excludes temporary workers.
 (c) Total expenditure on roads in each area by all authorities, other than expenditure on maintenance by Highways Department—amounting to £1,181,305 (Metropolitan £171,249, other incorporated areas £1,010,056).
 (d) Expenditure by Local Authorities only—includes contributions to hospitals, upkeep of cemeteries, garbage collection and disposal, etc.
 (e) Rated on Unimproved Values.
 (f) Combined figure for Upper North unincorporated and Remainder of State shown under Upper North unincorporated.
 (g) Combined figures for D.C.'s, Peake and Coonalpyn Downs and Murray Mallee unincorporated shown under D.C. of Peake.
 (h) Details are for "Primary" Statistical Divisions (see map, page 4). Because of this, figures for Local Government Areas do not add to Statistical Division totals and no information can be given for unincorporated areas.
 (i) Included in Remainder of State.

No. 102—Consumer Price Index: Adelaide

(Base of Each Group : 1952-53 = 100)

For current statistical purposes the Consumer Price Index replaces both the "C" Series Retail Price Index and the Interim Retail Price Index. The list of items is more extensive than formerly and hence the new Index measures more accurately quarterly variations in retail prices of goods and services representing a high proportion of the expenditure of wage earner households.

Note: Minus sign (—) denotes decrease.

(a) In processing the 1961 Census data, a conjugal condition or occupational status was allocated prior to tabulation in all instances where this information was not stated.

(b) For purposes of this table Irish nationality is included with British.

(c) So described in individual persons schedules.

(d) Includes police, fire brigades, hospitals, medical and dental services, education, and business services such as consultant engineering and surveying, accountancy and auditing, industrial and trade associations, advertising, etc.

(e) The category "not at work" includes those who stated that they were usually engaged in work, but were not actively seeking a job at the time of this census by reason of sickness, accident, etc., or because they were on strike, changing jobs, or temporarily laid off, etc. It includes also persons able and willing to work but unable to secure employment and casual and seasonal workers not actually in a job at the time of the census. Therefore, the numbers shown as "not at work" do not represent the number of unemployed available for work and unable to obtain it.
